A new world of **mobility**

www.m2msoft.com/wizin

www.m2msoft.com/wizin

M2Msoft is offering its own SIP softphone (basic and pro versions). Interoperable with all the SIP servers, **WiZiN** is also compatible with the majority of service providers. Its deployment is guaranteed for smartphones and pc tablets, on Android v2.1 Level 7 and superior.

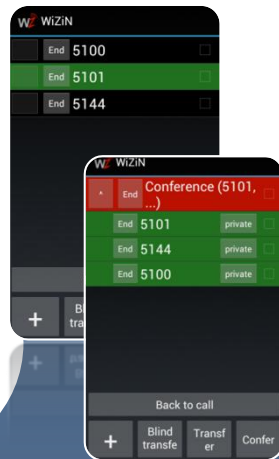

### Telephone functionalities

The **WiZiN** SIP softphone is ensuring an intuitive and advanced use, offering the same functionalities as an office phone. The user can transfer calls (multi lines and multi profiles offered in the basic version), forward them or make conferences.

### Mobile conferencing bridge

The **WiZiN** SIP softphone has the particularity of being a conferencing bridge on its own, locally and on a mobile way (8 lines offered on the pro version). During the conference call, the adding and the deleting of participant are intuitive.

### Contacts

The **WiZiN** SIP softphone integrates personal contacts and the business directory simultaneously.

### Exploration on wifi

**WiZiN** is offering the unique opportunity of establishing calls without servers via its exploration function on the wifi network. Enjoy an unlimited discovery on the pro version.

### Voice messaging

Missed calls and voice messages are immediately notified to the user (MWI). The access to the messaging server is done via a direct dial.

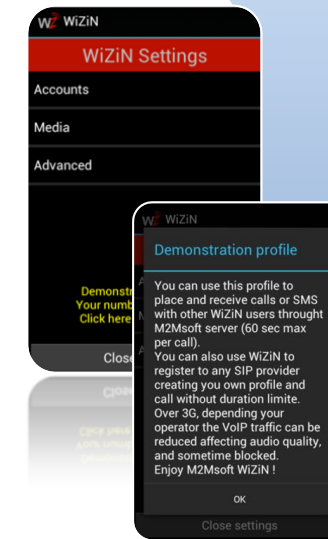

### SMS function

**WiZiN** handles the SMS function on its basic and pro versions with the directory/historical/exploration integration allowing the sending and the receiving of SMS messages on SIP.

### Simplified configuration

Straight after the installation of **WiZiN** on your device, a demonstration profile is generated. An unique number is given, enabling free calls between WiZiNs via the M2Msoft server. Through this server, calls are unlimited on the pro version and limited to 60 seconds per call on the basic version.

### Advanced functions

- Advanced audio compression
- Encryption

**WiZiN** is using an encryption module developed by Octip\*, a M2Msoft partner, ensuring security and confidentiality at a really high level.
