## Overview

The Prepaid solution by M2Msoft offers an easy and fast setup for prepaid communications service. Fully configurable, the application offers a real time supervision interface, detailed tickets for billing, users management on database and a precise definition of communications' costs.

## Functionalities of the solution

- Service of an unique office with a multilingual interactive voice response
- Service of call 'one step' with identification of the client according to the caller number
- Cost of calls based on various criterions (final destination, DID, caller number, user account)
- Management of CLI numbers (guests)
- Creation and charge of an account by phone
- Management of calls without account (prepaid cards)
- Consultation of users' accounts
- Real time supervision of current communications
- CDR (Calls Details Records) displayed from the application and exportable at a CSV format
- Generation of periodical states of billing per client at a CSV format
- Voice recognition and synthesis

## To order
