

The French company M2Msoft is bringing top customizable solutions as well as standard products for enterprises, service providers and industrials at Gitex Technology Week 2009.

Article continues below ▼

Thanks to a ten years expertise in very constraining and exiging VoIP environments, and an early involvement in protocols designs (H323, SIP, codecs) the "telephony over Ip "by M2Msoft is leading solutions in many business fields.

Consequently M2Msoft worldwide known companies such as THALES, EADS, LVMH and all French highways have chosen M2Msoft products in military field, boats, business aviation communications, emergency call systems and secured call centers.

Conscient of the rapid development and the potential of the Middle East market, M2Msoft decided to extend its influence in this region and is now looking for local system integrators and added value distributors

In Gitex exhibition, M2Msoft presents its "all in one" smart (H323 & SIP) Softswitch and IPBX for small to very large corporations and service providers ; its intelligent conference (audio/video) system and its call recorder adaptable on any PBX, iPBX of the market.

M2MSoft presents its innovative functions at the French pavilion in the hall 4 (A4-38).
